

Embedded Software Development Projects Done Right

Take Control of Your Project when you don't have all the resources

Find out how it is faster and less expensive to contract out part or all of a project.
Put your projects in the hands of people with the right experience.

No waiting for resources

Outsource your work to
our experienced
development team

No daily management worries

Our project managers
make sure you get your
deliverables on time

Be on time within budget

We help you make your
customer a repeat
customer

Our Method Ensures Your Success

We co-create a solution that fits your needs, costs, and schedules.

ECU Software Examples

Applications

HVAC Climate Control
Heat Pump Control
Human-Machine Interface
Interior/Exterior Lighting Control
Transmission Gear Select
V2X Communication Stack

Software Integration

AUTOSAR/non-AUTOSAR-
Software Integration

Flash Tools

End-of-Line ECU Flashing
ECU Software Maintenance Tool

Boot Loader

UDS Boot Loader
Multi-slave DSP Bootloader

Communication Drivers

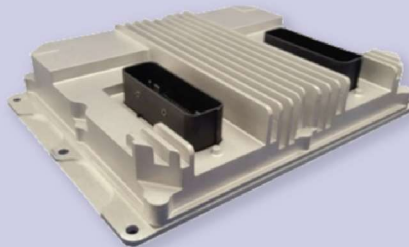

CAN-FD, LIN, SPI

AUTOSAR

Software Components
Basic Software
Complex Device Driver

Diagnostics

DEM Manager
Diagnostic Handlers

Supported Standards

- MISRA
- ISO 26262
- AUTOSAR
- Automotive SPICE
- ASAM
