

Vision

Danlaw Vision is a one-stop automotive cloud that fast tracks the launch of Connected Car services for our customers. Vision gives you the opportunity to engage with your customers and their vehicles to turn every ride into a story.

Vision connects automotive, enterprise, and consumer markets by delivering seamless connectivity, customer engagement, and management tools for devices and vehicles to create amazing services. Our customers use Vision to build applications that enhance the automotive experience for consumers.

About Vision

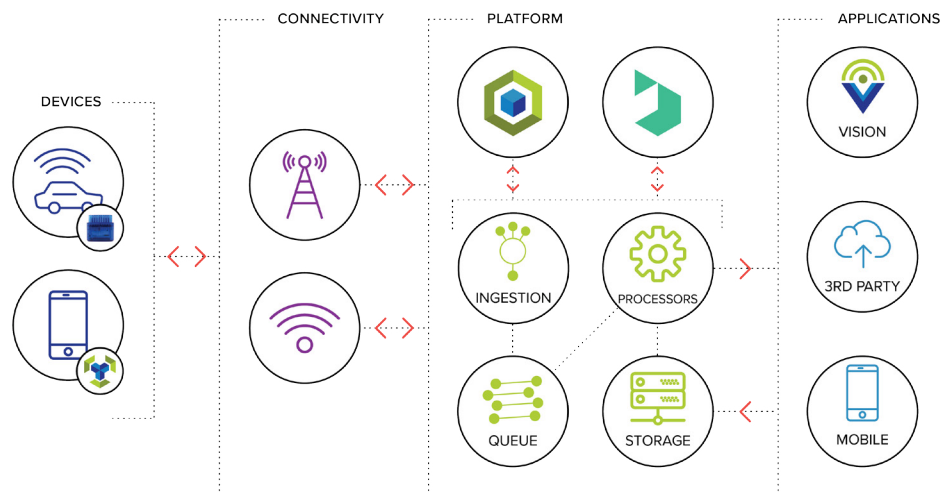

Connect: Allows vehicles to securely connect and communicate vehicle and trip data to the cloud via our award winning DataLogger device. We collect and process data from millions of vehicles and billions of miles.

Engage: Offers insights by combining vehicle and trip data with business-specific data. Customers gain real-time contextual and predictive insights on vehicle usage, vehicle health, product management, outreach campaigns, and consumer behavior to enhance customer experience.

Manage: Provides a simple, easy to use interface to manage customers, vehicles, and devices, as well as secure OTA updates to devices, data storage and delivery, and third party service integrations.

Create: Vehicle and trip data can be securely shared to create applications that transform consumer experience. Vision helps to simplify, streamline, and enhance user experiences by enabling applications like: car sharing, ride sharing, fleet management, insurance, smart homes, smart cities, and third-party services.

Service: Gives insight into vehicle health and diagnostics to help build relationships with vehicle owners and service providers. Vision helps with vehicle maintenance and improves performance while increasing dealership and service revenue opportunities.
